Task 3

App Icons and Splash Screen

App Icons :

1. I have created the app icons for the Spotify app using **Icon Kitchen** and implemented them successfully.
2. Added the generated icons to the **assets** folder.
3. Ensured compatibility with both **Android and iOS** platforms.
4. Icons appear correctly on the **home screen and app drawer** across different devices.
5. Implemented **adaptive icons** for Android to enhance the visual experience.

Splash Screen :

1. I have created and implemented the **Splash Screen** for the Spotify app using **React Native**.
2. Added the splash screen image to the **android -> app -> src -> main -> res** folder.
3. Ensured compatibility with both **Android and iOS** platforms.
4. Set the **background color** to match the app theme for a smooth transition.
5. Verified the splash screen appears correctly on different devices and resolutions.
6. And also when it is bundled it shows the splash screen very smoothly.

Overview:

First, I added the **splash screen images** to the required **res folder**. Then, I built the **APK file** using **Expo**. Installed the APK on my **physical device**. After installation, the app launched smoothly with the **app icons and splash screen** properly bundled.

These are the ScreenShot of Demo :
